HOW TO MAKE LICENSE PLATES BY 4 STEPS

Free guide for license plate to start license plate making step by step.

1 GET BLANK ALU PLATE

Buy blank plate with standard license plate reflective film & aluminum.

2 EMBOSS PRESS BLANK

Emboss and press blank license plate by emboss presses i.e. hydraulic press machine Victio 5.

3 ROLLER COATING

Paint license plate with ink by using roller coating machine (Lenius 3) are commonly used for most countries. Usually after coating, the plates are finished. But if your plate need hot stamped, you can skip this step.

4 HOT STAMPING

For some countries, the governments require manufacturers to hot stamp license plate with hot stamping machine (Lenikey 2) instead of painting by roller coating.

YOU ARE READY TO GO!

Good luck!
